

Fiona,

You are receiving this notification as the City and their Contractor are about to commence improvement work within your Canyon creek by the lake, Canyon creek villas and Canyon creek by the park neighborhoods. We ask that you share this information with all your neighbors and HOA contacts.

The typical construction process includes City staff marking locations for asphalt patching and curb replacement. Then the Contractor will spend a few days removing and replacing curb within the neighborhood. Once the Contractor is onsite, we ask residents to locate and mark their sprinkler heads to assist the contractor during the curb removal and replacement process. After the concrete has cured, the contractor will backfill and restore the area with seed.

A few weeks later, another contractor will be on site to patch and mill the roadway which will assist with removing irregularities in the pavement. A UBAS surface treatment will be placed shortly after the milling operation. After some minor cleanup, the improvements will be complete.

Thank you for your patience and understanding as we make the needed improvements in your neighborhood. If you have any questions or concerns during construction, feel free to contact Kyle Rodenhouse with the City of Lenexa Municipal Services Department at 913-477-7806.

# Canyon Creek by the Lake
